SME-IN-A-BOX

Starting or running a business can be difficult, but choosing the right internet partner shouldn't be. Let us help you grow your business by connecting you to world class solutions and opportunities.

Mainone SME-in-a-Box is a bundled service specifically designed to provide high speed internet solutions to small and medium enterprises in Nigeria. Our solution is a simple to use, plug and play service that helps drive business growth, productivity and profitability without compromising quality and value for money.

It is suitable for use at home and in small offices and also available in Lagos and Benin, Edo State.

MainOne's SME-in-a-Box solutions delivers:

- Bundled internet delivered over a single fibre optic connection.
- Web self-care portal for real time traffic monitoring and payments.
- Ease of use, WI-FI enabled modem with no technical expertise required.
- Dedicated support for optimal service availability.

How the SME-in-a-Box Solution Works

Upon sign up, a MainOne certified engineer will install our modem at your office and connect you to our highly reliable and resilient fibre optic technology powered network. The internet will be provisioned and tested and you get access to our network almost instantly. The modem is also a fully functioning wireless router.

MainOne's SME-in-a-Box solution delivers the best in-class and highest quality performance possible over broadband fibre connection to help drive your business growth and efficiency.

Why SME-in-a-Box?

Enterprise grade broadband internet services at cost-effective prices.

Unlimited data to keep your business connected and running smoothly without interruptions.

Drive business growth through quality connections to your customers and business partners.

Improved efficiency and reliability.

Flexible and adaptable to growing business unique requirements.

Superior customer experience with dedicated support team.
